SUMMARY

Data Visualization Analyst with experience in Python, SQL, and data visualization tools like Tableau. Skilled in data cleaning, exploratory data analysis, and building dashboards to derive actionable business insights. Strong background in data storytelling, KPI design, and analytics-driven dashboard development.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Visualization:** Tableau, Power BI
- **Tools:** Excel, Google Sheets, Jupyter, Google Colab
- **Other:** Statistics, Data Cleaning, EDA, Dashboard Design, KPI Frameworks, ETL Pipelines

PROJECTS

Airline Passenger Satisfaction Analytics

Tools: Tableau, Python (Pandas, NumPy, Seaborn) | [View Tableau Dashboard →](#)

- Built an end-to-end data analytics project on airline passenger satisfaction using 23K+ reviews; identified key drivers of dissatisfaction and delivered data-backed improvement strategies.
- Developed a complete ETL pipeline and performed EDA, correlation analysis, and segmentation using Python (Pandas, NumPy, Seaborn) to uncover insights across service factors and customer segments.
- Designed KPI-driven Tableau dashboards highlighting service performance, customer recommendation behavior, and segment-wise insights, enabling actionable business recommendations for improving customer experience.

EDUCATION

Bachelor of Technology (Artificial Intelligence)

Newton School of Technology, Rishihood University 2024–2028

Intermediate (Class XII)

Global International School 2023–2024

Matriculation (Class X)

Blue Bells School 2021–2022
